**SERICA ENERGY PLC  
FARM-OUT OF UK BLOCK 54/1b & UK DRILLING PROGRAMME**

**London, October 10, 2006** – Serica Energy plc (AIM and TSX Venture: SQZ) announces that it has concluded a farm-out of part of its interest in UK North Sea Block 54/1b, where it expects to commence drilling the Oak prospect later this month. Serica will also commence drilling of an exploration well on the Columbus prospect in Block 23/16f during the fourth quarter of 2006.

In the Southern Gas Basin, the ENSCO 92 jack-up rig will drill the Oak prospect in Block 54/1b, targeting the Permian-aged Leman sandstone reservoir at a depth of around 7,500 feet. Drilling operations are scheduled to take about 30 days. Serica is the operator of the Block and the well will be drilled under a contract with Peak Well Management Limited

As part of its strategy to spread exploration risk and manage costs, Serica will reduce its interest in Block 54/1b from 100% to 50% through the farm out of a 50% interest to Centrica Resources Limited ("Centrica"), a wholly-owned subsidiary of Centrica plc, in consideration for Centrica bearing 100% of the costs of drilling the Oak well up to the point where the total costs have reached £8.5 million or a decision to test the well has been made, whichever occurs first.

In the Central North Sea, the semi-submersible GlobalSantaFe Rig 140 will drill the Columbus prospect in Block 23/16f, in which Serica has a 50% interest, targeting the Paleocene-aged Forties Sandstone reservoir at a depth of around 9750 feet. Drilling operations are scheduled to take about 30 days. The well will be drilled by Applied Drilling Technology Inc. (ADTI), a division of GlobalSantaFe Corporation, under a contract with Serica's partner in Block 23/16f, Endeavour Energy UK Limited.

**Chris Atkinson, Chief Operating Officer, commented:**

*"The next 12 months will be an exciting period for Serica with intensive drilling across our assets targeting a range of prospects in terms of risk and reward. This includes exploration wells on Block 54/1b and Block 23/16f in the North Sea this year and exploration and development wells in Indonesia in 2007."*

*"The farm out in Block 54/1b reduces drilling costs and exploration risk to the Company ahead of the drilling of the Oak prospect, and we welcome Centrica as our new partner in the Block."*

**Background Notes**

Serica Energy plc is an international oil and gas exploration company with operations in Indonesia, the UK North Sea, Spain, Ireland and Vietnam. The Company's ordinary shares are listed in London on AIM and on the Canadian TSX Venture Exchange under the symbol "SQZ".
